M4 Verification and RevisionTable

Project: IT0043L Module 4, AI Responsive Layout Evaluation
AI Tool: ChatGPT
Date: October 30, 2026

AI Suggestion	What the AI Claimed	How I Tested It	Correct?	What I Did
Check navigation at 320px	Navigation links might overlap or become difficult to read.	Viewed the website at 320px using Chrome DevTools.	No	Kept the existing layout because all links were readable and properly spaced.
Check the hero heading at 320px	The heading might wrap awkwardly on a narrow screen.	Inspected the hero heading at 320px.	No	Kept the layout because the heading wrapped cleanly.
Check the profile image at 320px	The profile image might have an unsuitable size or proportion.	Inspected the image at 320px.	No, for image sizing	Kept the image sizing. Separately noted that the Contact link appeared slightly too far right.
Check navigation at 768px	Navigation links might have inconsistent spacing or alignment.	Viewed the website at 768px.	No	Kept the navigation because it looked clean.
Check the hero layout at 768px	The text and profile image might look unbalanced.	Inspected the hero section at 768px.	No	Kept the layout because it looked balanced and readable.
Improve feature cards at 1440px	Card text might be too small and the cards might be too far apart.	Inspected the feature cards at 1440px.	Yes	Revised the CSS to improve typography and spacing, then checked the layout at 320px, 768px, and 1440px. The layouts looked

				good after revision.
Use a complete CSS revision	A revised stylesheet could improve readability and responsive layout consistency.	Replaced the stylesheet and checked the page at all three viewport widths.	Improvement observed	Revised the CSS to improve typography and spacing, then checked the layout at 320px, 768px, and 1440px. The layouts looked good after revision.

AI Suggestion	What the AI Claimed	How I Tested It	Correct?	What I Did
Avoid changing the navigation layout at 320px	The navigation might need CSS changes to improve spacing.	Viewed the navigation at 320px using Chrome DevTools.	Rejected	Rejected changing the layout because the links were already readable and properly spaced. Changing the layout without a reproduced defect was unnecessary.
